

D.I.Y. Doggie bag dispenser for your neighborhood or yard

Clark County Neighbors for Clean Water Program

1.

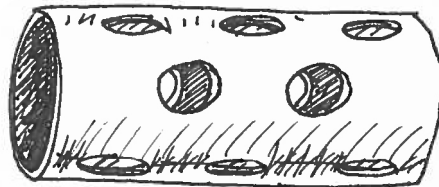

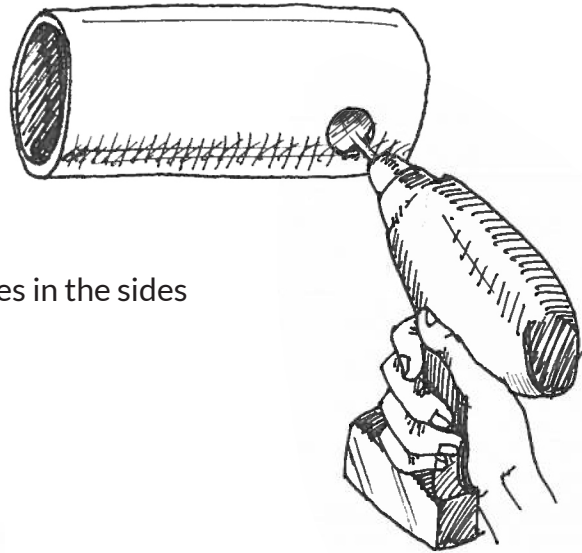

Start with a regular old piece of PVC pipe, around 6" wide (bonus points for reusing scrap material).

2.

Using a 1" - 2" spade bit, drill holes in the sides of the pipe a few inches apart...

...until you have holes all the way around.

3.

Mount the PVC on a sturdy post or attach it to a fence or existing post (be sure not to mount it to city or county signs).

You and your neighbors can stuff old grocery or newspaper bags both in the sides and in the holes, and dog owners can easily grab one as they walk by!
